

テコの応用により、少ない力で刃材を切断でき、切断後の刃先のダレは生じません。
マナ板の位置調整はハンドル操作一つで簡単にできますので、
刃切・罫切がこの一台で対応できます。

It cuts steel rules with less power, and with easy, effective lever action. Upper and lower cutting blades are angled to prevent damage to the cutting edge of the rule. It is easy to adjust the steel rule guide with one operation so this machine can handle both cutting rules and creasing rules.
