NCD753-MIR (Mirror finished)	0.7×23.6	4575	Edge angle 53°

Reduction of paper dust / Prevention of edge damage

Reduction of paper dust

Obtuse edge of the first bevel reduces edge damage and it brings reduction of paper dust. It is also effective for dies for small lot or being set frequently.

Current rule cutters are available

43° second bevel makes it possible to use current rule cutters.

Special order is available

We can supply your original products by adjusting the angle or hardness.

Effective for the prevention of curling

Obtuse edge holds down the products and reduces the curling of them like the part of zipper or hook hole.
